A B S T R A C T

   In the example of the invention, an accepting
section of a privilege management system accepts
privilege coupon data and a right data acquisition
request. The privilege coupon data includes permitting

5   side condition ID which specifies a utilization
permitting side which permits granting a privilege.
The acquisition request includes a utilizing side
ID indicative of a right data utilizing side. The

10 verifying section determines that the privilege is
granted to the requesting side when the permitting
side condition ID is consistent with the utilizing
side ID. The service section grants the privilege
to the requesting side when it is determined that

15 the privilege is granted.
